Do what matters

AI for the Future of Work

Option A:

How might we use AI to reduce uncertainty and stress for people navigating the workforce—especially students—while building systems that are fair, transparent, and responsible from development through operations?

Student resource guide available in Canvas*

AI for Wellbeing

Option B: (non-clinical)

How might we use AI to support wellbeing for students OR tech-industry workers by enabling healthier work- or school-life balance—while clearly avoiding AI as a replacement for professional mental health care?
